

ELHAM RASTIGHAHFAROKHI

Espoo, Finland | +358 41 570 4904 | elham.rasti86@gmail.com [LinkedIn Profile](#)

PROFILE

IT Engineering graduate from Metropolia University of Applied Sciences with hands-on experience in Software Engineering, container platforms, and cloud-native concepts. Proven track record of evaluating container architectures and software quality through enterprise-level projects in collaboration with Nokia. Skilled in Linux, Docker foundations, and Red Hat OpenShift/MicroShift environments. Enthusiastic about applying technical analysis, automation pipelines, and infrastructure management tools in a junior DevOps/Cloud role.

EDUCATION

- Bachelor of Engineering - Information Technology | Metropolia University of Applied Sciences (2022 - 2026)
 - *Bachelor's Thesis:* Cloud-Native SBOM-as-a-service Platform (Focused on cloud-native technologies and automation pipelines)
-

PROFESSIONAL EXPERIENCE & PROJECTS

Software Engineer (Nokia Espoo Innovation Garage Projects) | Metropolia UAS (Mar 2025 - Sep 2025)

- **Container Platforms Evaluation:** Evaluated the performance of different container platforms, gaining direct exposure to cloud-native infrastructures.
- **OpenShift & MicroShift:** Worked with OpenShift and MicroShift environments to deploy and analyze containerized system behaviors.
- **Benchmarking & Quality Assurance:** Benchmarked Open-Source Composition Analysis (SCA) tools by comparing generated Software Bill of Materials (SBOMs) against trusted reference SBOMs.
- **Linux Environment Analysis:** Conducted technical analysis and system monitoring within Linux environments to track configuration and deployment behaviors.

Kubernetes Cluster Deployment & Optimization (Academic / GitHub Project)

- **Cluster Setup:** Deployed and configured a lightweight Kubernetes cluster using MicroShift on Red Hat Enterprise Linux (RHEL 9.5).
- **Docker & Tooling:** Applied foundational Docker concepts for application containerization and managed pods using the OpenShift CLI (oc).
- **Upgrade Analysis:** Studied the practical impact of system upgrades on CPU, memory usage, and pod stability during infrastructure changes.

SKILLS

- **Technical & Containerization:** Linux (RHEL), Red Hat OpenShift, MicroShift, Kubernetes principles, Docker (foundations), Cloud-Native architecture
- **DevOps Tools & Concepts:** Git/GitHub, version control, CI/CD pipeline principles, automation workflows
- **Analysis & Documentation:** Benchmarking, technical reporting, data structuring, Markdown

CERTIFICATIONS & TRAINING

- **Red Hat Academy** – Program Learner (Focus on Linux and OpenShift ecosystem)
- **AWS Academy Graduate** – Cloud Architecting
- **CCNAv7** – Switching, Routing & Wireless Essentials
- **DataCamp** – Data Analysis
- **JavaScript Essentials 1 & 2 | Ethical Hacker Essentials**

LANGUAGES

- **English:** Professional proficiency
- **Finnish:** Basic (Learning)
